CANADIAN MINERAL EXPLORATION

Advancing Three District-Scale Projects in Northwestern Ontario

October 2026

Forward Looking Statements

This presentation may contain “forward-looking statements.” These forward-looking statements are made as of the date of the PowerPoint presentation and Storm Exploration Inc. (“Storm” or the “Company”) does not intend, and does not assume any obligation, to update these forward-looking statements. Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures and requirements for additional capital.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of property interests; future prices of mineral resources; accidents, labour disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals or financing.

Unless otherwise indicated, Bruce Counts, P.Geo, President, CEO, & Director of Storm Exploration Inc. and a Qualified Person under National Instrument 43-101, has reviewed and is responsible for the technical information contained in this presentation.

Essential for Shareholder Value Creation

Prioritizing Stakeholder Relationships

- ✓ **Exploration Agreements signed** with First Nations in whose traditional territory Storm explores
- ✓ Established framework for **ongoing consultation** with the **FN & community** participation

Strong Capital Position

- ✓ **Low share count** – 36.6M I/O
- ✓ **Strong treasury** following recent \$3.2M with participation renowned resource investor Eric Sprott

Strategic Land Package

- ✓ Ontario: Home to **200Moz + gold** production
- ✓ **100% ownership** of 3 projects
- ✓ **Confirmed** precious metal & critical mineral endowment

Immense Potential Upside

- ✓ **Limited modern exploration** on district-scale properties
- ✓ **Confirmed discovery of new VMS system** at Gold Standard Project, with assay results pending

Prioritizing Stakeholder Relationships

Increases Operational Certainty

Corporate Governance

Storm seeks to foster investor, stakeholder & rights-holder confidence by adopting policies that ensure the highest level of corporate integrity & business ethics.

First Nations & Community Relationships

Storm has signed Exploration Agreements with First Nations in whose traditional territory it explores.

Our philosophy is that the participation of First Nations is essential to the success of any project, as reflected in a statement by **Solomon Atlookan**, Chief of the Eabametoong First Nation (EFN):

“For far too long, exploration companies have sought to obtain permits before working collaboratively with First Nations. This agreement recognizes the role of our community in permitting, monitoring, and regulating any activities on the land. Storm has been very respectful in working with EFN and this approach should be a model for others to follow.”

Strong Capital Position & Team

Capital Structure

36.6M

MANAGEMENT
& INSIDERS

Strategic Land Package in Proven Jurisdiction

Home to +200Moz of Gold Production

Gold Standard Property

Immense Potential Upside

1900 – 1903

3 historical high-grade gold mines found

1969–1971

International Nickel Co. – All 4 drill holes:

- < 50m in length
- Intersected sulphide mineralization
- Revealed Cu & Zn mineralization
- Not assayed

STORM'S Modern Exploration

- Large conductivity anomaly identified
- **Q3 2026 Drill Program confirmed new mineralized Volcanogenic Massive Sulphide (VMS) system**

A New VMS Discovery. What's Next?

✓ IDENTIFIED

Geophysics + Geology
+ Geochemistry

Identified evidence
of potential VMS
system

✓ TESTED

Drill Program

Completed
1,500m in 8 holes

Drilling 1.9km of
the VMS target's
7km strike-length

✓ CONFIRMED

New VMS System
Discovered

All holes intersected
disseminated and/or
semi-massive to
massive sulphides

Core logging &
processing underway

UPCOMING

☐ Geological Update
Expected Imminently

Geology and mineralized
intersection widths to be reported
following core logging

☐ Assay Results

☐ Follow-up Drill Program

What Makes VMS Deposits Compelling?

VMS Deposits *Often*:

Contain Multiple Valuable Metals

offering exposure to many commodities.

Yield High-Grade Mineralization

increasing potential value.

Occur in Clusters

providing multiple discovery opportunities within same system.

Canada hosts some of the world's largest VMS Deposits:

Kidd Creek Mine (Timmins, Ontario)

1966 to present

- Produced over¹: 772M lbs Cu, 2.1 lbs Zn, 400M oz Ag
- Grades²: 2.29% Cu, 6.15% Zn, 86.2g/t Ag

Horne Mine (Rouyn-Noranda, Quebec)²

1927 to 1989

- Produced 53.7Mt of ore
- 2.22% Cu, 6.1g/t Au and 13g/t Ag

Significant Exploration Upside

Storm's 7 km conductivity anomaly provides an extensive target for follow-up exploration, with mineralization yet to be established across its full extent.

¹Discovery Mining website, Oct 2026

²Gibson, Harold L., et. al, The Horne Mine: Geology, History, Influence on Genetic Models, and a Comparison to the Kidd Creek Mine in Exploration and Mining Geology (2000) 9 (2): 91–111

100% Ownership of 2 District-Scale Projects

Demonstrable Endowment with Modern Exploration

Miminiska-Fort Hope Greenstone Belt

- Part of the mineral rich Uchi Geological Subprovince (>30 Moz Au production)
- First gold discoveries made in 1930's

Mineral Potential Recently Recognized

- Storm's sale of the Miminiska Project in Dec. 2025 highlighted the potential of the belt
 - Staking rush: 75,894 ha of mineral claims acquired in the area since the announcement

Projects Primed for Discovery

- >35,000 ha of prospective geology
- Drill-confirmed high-grade gold targets
- Demonstrable base metal potential
- Exploration Agreement in place with Eabametoong First Nation

Keezhik Property

Prospective Geology

12,480 ha

- 8 drill-confirmed high-grade gold targets
- Surface gold showings span the property
- Last drilled in 1988
- Property-wide airborne magnetic & Lidar surveys completed

Next Steps

- Airborne EM surveys
- On-ground target development

Goal → Drill-ready in 2027

³ Historical results have not been independently verified by Storm Exploration; and, there is no guarantee that the Company can reproduce the results in whole or in part. Potential investors should not rely on these historical results when making an investment decision

⁴ NI 43-101 Technical Report on the Keezhik Lake Project: A. MacTavish, P.Geol. & J. Arnold, P.Geol., 9-Oct-2007

Attwood Property

Underexplored Geology

23,230 ha

- Last drilled in 1972 - only 19 historical drill holes
- Host to historical Weese Lake Cu showing
- Sulphide mineral showings found property-wide, including arsenopyrite in banded iron formations (BIF)
 - Strong correlation with gold mineralization
- Large untested electromagnetic anomalies

Next Steps

- High-resolution geophysical surveys
- Soil sampling & geological mapping

Goal → Drill-ready in 2027

Upcoming Catalysts

	H2 2026	H1 2027
Gold Standard Project Focus: Expand on VMS Discovery	Additional Ground VLF-EM Surveys ✓ Geological Mapping & Soil Sampling ✓ Phase I Drill Program – 1500m ✓ Confirmed discovery of New VMS system ✓	Assays Results Geological Mapping & Geophysics to refine target Plan for Phase II Drilling Start Phase II Drill Program
Keezhik Project Focus: Prepare for drilling in 2027	Property-wide Airborne VTEM Survey ✓	Refine targets Plan for Phase I Drilling
Attwood Project Focus: Prepare for drilling in 2027	Property-wide Airborne VTEM Survey ✓	Refine targets Plan for Phase I Drilling

Key Reasons To Invest

**Prioritized
relationships** w/
FN & community

Tightly held
share structure –
36.6M I/O

Confirmed
critical & precious
metal
endowment

STORM
EXPLORATION

100% ownership
of 3 projects in
renowned NW
Ontario

**Limited modern
exploration** at
district-scale
properties

Assays pending
from discovery of
new VMS system
